Dear all,

My name is Mia and I am hereby submitting my application for the position of Co-Chairperson of the Council of Members 2026/2027.

I have been an active member of CDN's Member Organization Sustainable Development Forum Green Window (*Forum za održivi razvoj Zeleni prozor*) for six years. During that time, I have also become an active part of the CDN community and was a member of the Executive Committee in the previous mandate, focusing on the Feminist Action Team, regional responsibility for the Balkans, collaboration within CDN and development of other projects. On behalf of CDN, I am currently a member of the Council of Europe's Advisory Council on Youth, where my focuses are gender equality and LGBTQ+ rights, peace and security, and shrinking of civic space.

My experience within CDN has been varied and enriching. I am motivated to remain involved in the functioning of the organisation in this stage of its journey, when new structures are being implemented. Every network of this kind depends on its membership and an important task for CDN going forward is to further develop the ways in which MOs and their members can work together.

The Council of Members thus plays a big role in strengthening CDN from within and helping strengthen the place we have in the green community of Eastern Europe, and beyond. It is an opportunity to collaborate and network, build new connections and nourish old ones. It is especially relevant that the topic of biodiversity is the central topic of the Council for its first year, since it is one of the pillars of the green movement and has always been important in the work of CDN. As the central topic of CDN's workplan for the year, it makes sense that the Council work towards supporting its implementation. The Co-Chairpersons will have to bring their experience and expertise in order to help the Council work, and this is something that I find very interesting.

This first year of the Council is a good ground to determine how MOs and its members see it and their roles in it. Since the body was created in theory, practical knowledge that we will gain will help shape and change it where necessary, in order to try and correct some of the gaps, inconsistencies, and irregularities. It will be a challenge for CDN to moderate a body of this scope, especially as the network continues to expand. As a Prep Team member, Action Team responsible and Working Group Coordinator, and EC member, I have experience with coordination of participants and moderation of meetings, as well as the technical aspects of CDN documentation and IRPs.

I would highlight the need to have structured and organized meetings, to foster an environment where members can voice their opinions and discuss with one another, even though we will be meeting online, and to ensure that there is regional and gender balance across these discussions. This will be a first for all participants, including the Chairing Member Organisation. Together with my Co-Chairperson, I hope to offer support to them as well in the implementation of their Annual Agenda.

The experience we collect and present to the General Assembly in 2027 will hopefully be beneficial to the future generation(s) of the Council of Members. I see this as a challenge, but also motivation to help create something that lasts.

CDN has a very special place in my life. It is a supportive and motivational environment and has, in many ways, shaped many politically and socially active and engaged young people. It has certainly

been that for me, and I hope to help and put my knowledge and experience to good use. I am motivated and excited to see where the year takes us.

Thank you for taking the time to read this motivational letter. I'm looking forward to the opportunity to work with you in the coming months.

Wishing you a lot of strength, hope, and all good things!

Mia Uremović
